

WEED - A - CIDE

Non-Selective Concentrated Herbicide

A nonselective concentrated herbicide that can be applied for post-emergent or preemergent weed control. This economical soil sterilant is dilutable at the rate of one part product to 10 parts water. One gallon of product mixed at 1 to 10 with water will cover approximately 1000 square feet. This product is water emulsifiable and noncorrosive to equipment.

The product is formulated to be a desiccant when applied to live vegetation. This ability to dehydrate the plant causes a quick top kill. In addition to an effective top kill, the treatment will be absorbed through the roots to give a complete root kill. The effect will last a full season. This particular formulation has less of a tendency to leach than many weed killers of its kind. This allows for the product to be used for spot treatment as well as for large area coverage.

This emulsifiable soil sterilant provides effective vegetation control in areas such as parking lots, fence rows, railroad sidings, drainage ditch banks and around buildings or industrial sites where soil sterilant activity is desired. Care must be taken to keep this herbicide away from desirable flower beds, lawns, shrubs and trees.

This product contains 3.37 % Prometon and 77.78 % Heavy Aromatic Naphtha.

COMPOSITIONAL INFORMATION:

Contains:

Heavy Aromatic Naphtha (64742-94-5)

Methanol (67-56-1)

2,4-bis(isopropylamino)-6-methoxy-8-triazine (1610-18-0)

* All information contained above is per manufacturer's information.

TECHNICAL DATA SHEET

Product Name: Weed-A-Cide Concentrate
Item Number: C-860-55, C-860-05, C-860-05

Description: A non-selective concentrated herbicide that can be applied for post-emergent or pre-emergent weed control. This product is dilutable at the rate of one part product to 10 parts oil or water. This product is water emulsifiable and non-corrosive to equipment. When diluted with oil, this product functions as a desiccant when applied to live vegetation. This ability to dehydrate the plant causes a quick top kill within 24 hours. In addition to an effective top kill, the treatment will be absorbed through the roots to give complete root kill. The effect will last up to a full season. This allows for the product to be used for spot treatment as well as for large area coverage. As a soil sterilant herbicide, the active ingredients will remain in the soil up to a full growing season, thereby prohibiting the growth or re-growth of weeds and other undesirable foliage. Coverage is 650 to 1000 square feet per gallon of product. See label copy for dilutions. (Note: It is a violation of federal law to use this product in a manner inconsistent with its labeling. See product label copy for specific information.)

Where to Use: This non-selective herbicide that can be applied for post-emergence or pre-emergence weed control. It is recommended that this product be used in areas such as industrial sites, around buildings, roadways, rights-of-way, lumber yards, tank farms, cemeteries, driveways, parking lots, fence areas, recreational areas and airports.

WARNING: May be fatal if swallowed or absorbed through the skin. Do not breathe vapors or spray mist. Do not get in eyes, on skin or on clothing. Causes eye and skin irritation. In case of contact immediately flush eyes or skin with plenty of water. Get medical attention if irritation persists. This product is toxic to wildlife and fish. For terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash waters. Do not use or store near heat or open flame. IF SWALLOWED: Drink a large amount of milk or water. Do not induce vomiting because of aspiration hazard. CALL A PHYSICIAN IMMEDIATELY. If patient experiences difficulty in breathing, start mouth-to-mouth artificial respiration or administer oxygen. IF INHALED: Remove victim to fresh air. Apply artificial respiration if indicated. IF ON SKIN: Wash immediately with soap and water. IF IN EYES: Flush with plenty of water. SEE A PHYSICIAN IMMEDIATELY. KEEP OUT OF REACH OF CHILDREN.

Container Disposal: See product label copy for specific information.

Spill Or Leakage Procedures: Contain spill. Do not contaminate sewers, ground waters or surface waters. Soak up in inert absorbent material & place into properly labeled & sealed non-leaking containers for disposal in authorized manner as hazardous waste.

Product Specifications:

EPA Reg. No: 10807-146
Active Ingredients: *Prometon*: 3.73%
Inert Ingredients: 96.27%
Color: Brown
Odor: Aromatic Solvent
pH: N/A
Flash Point: 146°F
Lbs./gal.: 8.17
Shelf Life: One year in sealed container

HMIS RATING: Health-1; Flammability-2; Reactivity-0; Protection-E.
